

27th - 29th June 2022 at Johannesbergs Slott, Stockholm, Sweden

Through enabling dialogue around forest-based solutions, it is possible to address global challenges.

The Forest Academy is a discussion forum that focuses on the role of forests and the forest value chain in the development of a sustainable, circular bioeconomy. It is a three-day, intensive programme with thematically linked site visits that will demonstrate the effects of policy on the forest sector.

The programme will consist of seminar sessions, field excursions, discussion and network building. The programme content will be international and will be carried out in English.

Five reasons why you should not miss it:

1. You will be sharing your insights and connecting with other key decision makers from EU institutions
2. You will hear from leading experts as they discuss topical, global themes
3. We will explore how global challenges are being met with hands-on, innovative solutions
4. You will enjoy an exclusive, curated programme with revealing and informative site visits
5. You will be encouraged to have your say in shaping the future!

The event is by invitation only. Further information: www.forestacademy.fi

The Forest Academy for EU Decision Makers 2022 is a joint venture between Sweden and Finland. It is being financed by the Finnish Ministry of Agriculture and Forestry, the Swedish Ministry of Enterprise and Innovation and the Finnish Forest Foundation. It is being organised by the Swedish Forest Agency and the Finnish Forest Association.

The Forest Academy communication tool has been produced by the Finnish Forest Association. The association is a non-governmental, non-profit cooperation and communication body serving all major forest-related interests. In Finland, the communication programme has been running successfully since 1996
